

Do You Have a Child with Autism?

Help international researchers discover genes that contribute to Autism. Participate in a UCLA study sponsored by the Simons Foundation Autism Research Initiative.

Who can participate?

- Families who have one child 4-17 years old with an autism spectrum disorder (ASD) or a suspected ASD and no other children with ASD

What is involved?

- Questionnaires, interviews and gold-standard psychological assessments (including ADOS and ADI-R)
- Blood draw and short physical exam

Participants receive

- Written summary of test results
- \$200 per family

Participation in this study is strictly confidential and will not affect any services you may be receiving
